

What is in the world around me?

We learned that England is in the United Kingdom. We found it on a world map.

We know that we live in a city called Nottingham. We learned about Robin Hood.

We learned that animals have similarities and differences.

We know that there are four seasons: Autumn, Winter, Spring and Summer. We learned about the changes that come with each season.

We learned about British animals. We did observational drawings of hedgehogs and made them out of clay too. We loved collecting the stones and sticks to make them!

We learned about the features of our local environment. We visited Highfields Park and saw the University.

We learned about transport. We know that trams are used in Nottingham and went on a real tram with our own tickets!
